

$$\widehat{M}_{w,N}(t) = M_{w,N}(t)/M_{w,N}(0)$$

$$M_{v,N}(u) = \gamma_{e_v}\left(\prod\nolimits_w M_{w,N}(0)\right)$$

$$\cdot\mathcal{D}_v\left[K_N(t,u)\prod_w \widehat{M}_{w,N}(t)\right]$$

At the final root: omit $K_N(t,u)$ and γ_{e_v}.
There is no outgoing polynomial.
