new elementary piece
core or alias contribution
existing completed box $E$
$f_E(b) + \mu(v - b) - \gamma$
the stacking coefficient with rate $m(u, v, w)$
$\max(u, v) \quad \leq \quad w \quad \leq \quad u \; + \; v \quad \leq \quad 1$
tangent for the stacked box $f_{hE}(c) + \lambda(w - c)$
loss: new alias $\delta$, inherited alias $\gamma$, both $\delta + \gamma$
